EDISA

Over 40 years leading innovation in business management solutions

At **EDISA**, we have been committed to excellence in the development of business management software for over **40 years**. Since our foundation in **1983**, we have grown to become one of the leading references in the industry, with **more than 500 clients across 30 countries** trusting our solutions.

Our flagship product, **LIBRA**, has established itself as one of the top choices for **medium and large enterprises**, with successful implementations across a wide range of sectors. Through our unwavering focus on innovation, we have positioned **LIBRA** as a **comprehensive solution** that not only digitizes all your company's processes but also **intelligently automates** operations and the flow of information both internally and externally.

With **LIBRA**, we provide you with **32 fully integrated modules** that cover all your company's management needs: ERP, CRM, WMS, DMS, BPM, B.I, and much more. Our emphasis on customization ensures that **LIBRA** adapts to the unique requirements of your business without compromising the essence of a standard solution, guaranteeing continuous updates and improvements in functionality and technology.

At EDISA, we are committed to your success, offering you all the tools you need to help your company reach its full potential.

Benefits of implementing LIBRA in your company

Implementing **LIBRA** in your company brings a range of **key benefits:**

1 Operational efficiency

Enhance operational efficiency with streamlined management and optimized processes. LIBRA simplifies daily tasks, reduces administrative burdens, and allows your team to focus on what truly matters, boosting productivity and customer satisfaction.

2 Process automation

Transform your business by automating repetitive and manual processes, reducing errors, and increasing consistency in outcomes. LIBRA enables the configuration of automated workflows tailored to your business needs, hassle-free.

3 Resource optimization

Maximize productivity through efficient use of human, material, and financial resources. LIBRA's advanced planning and analytics tools help reduce costs and optimize every aspect of your business operations.

4 Integration and mobility

With LIBRA, integration with clients, suppliers, and other systems and devices is seamless and efficient. Additionally, access all your business information from mobile devices, managing your company in real-time from anywhere, without limitations.

5 Comprehensive management

Unify all areas of your business on a single platform, making coordination easier and improving decision-making. With accurate, real-time data, take full control of your company from one place.

6 Scalability and flexibility

LIBRA grows with your business, adapting to its ever-evolving needs. Add new modules and customize the platform to ensure it always meets the specific demands of your business, without complications.

The ERP of the future powered by AI

LIBRA provides a single solution to meet all business management needs, including **ERP, CRM, BPM, WMS, Business Intelligence, and Document Management.** Accessible from any device, LIBRA operates either on-premises at the client's facilities or hosted in a public or private cloud.

In addition to its functionality, **LIBRA** offers advanced services that enable:

Integration:
Seamlessly integrating LIBRA with other internal or external systems.

Automation:
Defining automated workflows and alerts to streamline operations.

Customization:
Adapting the system to the specific needs of each company through extensive parameterization.

LIBRA is built on cutting-edge technology, leveraging the latest **ORACLE** tools and integrating Artificial Intelligence components through the **LUA (LIBRA User Assistant)** module. This module offers:

- User assistance for navigating and using LIBRA.
- Advanced prediction and classification tools.
- Support for interpreting datasets and reports.

With **LIBRA**, you are one step closer to transforming your business management processes, embracing the innovation and efficiency that only Artificial Intelligence can deliver.

High sector-specific specialization: One solution, multiple sectors

At **EDISA**, we understand that every sector has its own unique needs and challenges. That's why we have developed specialized and fully integrated **LIBRA** verticals to cover all business and management processes, tailoring solutions to the specific requirements of each company to maximize efficiency and operational control.

Distribution and retail: Optimize inventory, sales, and supply chain management in real-time, enhancing customer experience and business profitability.

Industry: Automate production processes and improve plant management by integrating operations to maximize productivity and efficiency.

Food and agribusiness: Streamline production and logistics management while ensuring compliance with regulations, guaranteeing quality, efficiency, and control across all operations.

Construction and engineering: Gain control over projects, costs, and resources with tools designed for detailed planning and monitoring of each phase.

Chemical and pharmaceutical: Ensure rigorous traceability and quality management, complying with regulations and optimizing processes from production to distribution.

Services: Simplify the planning, execution, and tracking of activities, adapting to the specific needs of service-based businesses.

Fishing and frozen foods: Manage the entire value chain of the fishing and frozen food sector, from capture to distribution, ensuring traceability and process optimization at every stage.

Aluminum industry: Deliver specialized solutions, from production to distribution, ensuring quality and control at every step of the process.

Other public and private organizations: Promote transparency, control, and optimization of daily operations, enabling effective management aligned with institutional objectives.

The comprehensive solution that adapts to your business

LIBRA is the business management solution designed to meet the specific needs of every company, sector, and market. With a high level of customization, advanced integration, and international support, **LIBRA** optimizes processes and drives business growth, keeping your organization connected and efficient in an increasingly complex and globalized environment.

⚙ Maximum level of customization:

At LIBRA, customization is key. The solution is tailored to the specific needs of each company and sector without requiring additional developments. The system offers extensive parameterization capabilities, allowing you to customize everything from the user interface to entry forms, value lists, alerts, languages, process automation, and other critical elements that optimize your business operations.

⚙ Tailored for business groups:

LIBRA is designed to support business groups, offering advanced tools to manage complex structures at the fiscal, organizational, and accounting levels. From defining holdings and balance groups to managing multiple accounting plans and financial consolidation, LIBRA provides flexibility and total control. Configurable access permissions ensure the security of your information.

⚙ International support:

Designed for companies with a global presence, LIBRA simplifies configuration and customization across multiple countries, adapting to differences in language, currency, time zones, documentation, and tax models. It also includes specific modules for managing exports, imports, and international trading. LIBRA ensures seamless integration with public administrations by handling electronic invoicing, accounting, payroll, and providing interfaces for compliance with local regulations.

Easy to use, highly automated and fully connected

LIBRA simplifies business management by combining user-friendly design, intelligent automation, and complete connectivity. With customizable interfaces, integration with a wide range of devices and systems, and cutting-edge technology, LIBRA enables real-time decision-making and optimizes all your company's processes, ensuring efficient and seamless operations at all times.

For an increasingly connected and integrated business:

LIBRA is a true Inter-Enterprise Information System (SIIE) that ensures total integration with all the agents and systems your company requires. From connecting with machines and devices like scales, labeling systems, and automated warehouse systems to integration with electronic banking, public administration, other management software, and logistics operators. LIBRA also facilitates smooth interaction with customers and suppliers, web portals, social networks, and any other key agents in your value chain, ensuring an optimized and efficient flow of information for all your daily operations.

Real-time decision-making with dashboards:

LIBRA enhances decision-making by providing real-time dashboards. These dashboards allow tracking of key strategic and operational management indicators, delivering essential insights for critical decision-making processes such as entering new markets, financial control, production planning, and product profitability analysis, among others.

WITH LIBRA, YOUR BUSINESS REACHES A NEW LEVEL OF EFFICIENCY

Automate processes, connect with all key stakeholders, and enjoy an intuitive, customizable interface designed to streamline management and maximize productivity.

Intelligent automation:

LIBRA leads the way with advanced automation capabilities, enabling companies to optimize resources and reduce operational costs. The system includes a layer that simplifies the definition and scheduling of automated processes, offering real-time monitoring and auditing of key events to provide complete control over automated operations.

Fully customizable interface, adapted to your device and one click away:

LIBRA's interface is highly customizable and configured directly by the user based on their information and program access needs. It includes features such as graphic widgets, maps, data tables, calendars, and web page links, all designed to deliver a tailored and efficient user experience.

State-of-the-art technology for on-premise and cloud versions:

With over 30 years of evolution, LIBRA has consistently relied on the most robust and stable technologies, ensuring smooth transitions between versions without any loss of functionality.

Built on the latest Oracle tools and other market standards, LIBRA can be deployed either on-premises or in a public or private cloud, depending on each company's preferences and strategy. Additionally, the LIBRA Suite option integrates all Oracle technology into the product, offering simplified access and efficient maintenance.

Access your business data anytime, anywhere

With **LIBRA Mobility**, you can take your business wherever you go thanks to its mobile functionality. Turn your tablet or smartphone into a business management tool and access your company's information **anytime, anywhere**.

Now, your sales team can place orders in real-time, logistics personnel can update inventory directly in the warehouse, and senior management can instantly access reports and statistics—all from a mobile device. Stay connected, make informed decisions, and streamline your operations, **no matter where you are**.

Stay connected, make informed decisions, and streamline your operations, no matter where you are.
